## *Rail & Stile* Interior Doors

**There is no better way to display your unique style than solid wood interior doors and custom mouldings from The Door Stop. No other element of interior finishing will add more visual appeal, character and value to your home.**

- The Door Stop interior doors are hand crafted from solid wood using traditional craftsmanship and modern wood engineering.
  - Your doors can be constructed from virtually any species of hardwood or veneer. Only premium quality kiln dried woods are used.
  - All doors are custom designed and built. You can choose from the thousands of designs on file, or bring your own sketch or photograph. Combine your wood door with transoms or sidelites for a special location.
  - Add some art glass or further customize your doors with carving or laser etched glass or wood panels.
  - Doors are available in any width and in heights from 80" to 96". In new construction we typically supply 1 1/2" thick doors, but we can also supply 1 3/4" doors to fit existing jambs.
- The Door Stop interior doors may be pre-hung in matching jambs with your choice of hinges. Shop staining and finishing is available.
  - We offer a complete line of standard and custom mouldings in matching woods to complete your interior finishing package.

# The DOOR STOP

## Engineered Rails and Stiles

- Structural wood core consisting of three or more alternating grain blocks glued together and dried to optimum moisture content then clad on all sides with the selected hardwood species.
- This construction will withstand the extreme service environment of an exterior door with significantly less risk of warpage than one-piece rails and stiles.
- Panels in exterior doors are laminated from solid hardwood and structural plywood core to provide enhanced thermal performance and to eliminate the risk of cracking through.
